INKS

For all first time ink buyers we are offering through to the end of the year a free liter of

Teca-Print is pleased to announce the roll out of our all NEW interest free machine leasing program. This is your opportunity to own a new Teca-Print

Machine.

Equipment leasing has grown into a popular option for companies that are looking to acquire new equipment without all the up front cost or hassle.

Don't tie up your cash! Unlike a loan, with equipment leasing you have no down payment just fixed payments throughout the lease term which works well for budgeting.

Equipment leasing is also considered to be more easily attainable compared to a loan; which usually requires extensive documentation and often requires collateral.

Leasing won't deplete your cash reserve or have a negative impact on your balance sheet.

Benefits of Leasing

- Convenience
- Fixed Lease Payments
- Overcome Budget Limitations
- Conserve Credit Lines
- Possible Tax Benefits

thinner for every four (4) liters of ink purchased at one time.

Existing customers can take advantage of the same offers. With any six (6) month or more blanket order of four (4) liters of ink or five (5) pads. All blanket orders must be received by December 21st.

WG 701 – Wash Unit *Cleaning Made Easy*

This newly designed cleaning unit is a must for anyone undergoing

Ink Selections - Which Ink is Right for You!

TPC 180/TPC 311 – *Universal one and two component ink*

These glossy and quick drying ink systems are known for their excellent coverage. They can be used for a wide variety of thermoplastic materials as well as thermoset plastics, wood, paper and metal.

TPC 200/TPC 261 – *User friendly two component ink with high chemical and mechanical resistance*

These quick drying, glossy inks give a wide range of adhesion for many substrates such as cellulose acetate, thermoset plastics, polyamides, polyesters, acetal resins (post treated), pre-treated polypropylene, metals and varnished substrates. Used often for industrial and advertising applications.

TPC 230 – *Abrasion resistant pad printing ink*

For even higher durability requirements than the TPC 200. This glossy and quick drying ink is also chemically resistant to organic solvents, chemicals, dilute alkalis and acids. Excellent adhesion can be achieved on thermoset plastics, varnished surfaces, metals, NF-metals, polyamides, polycarbonates, polyesters, polymethacrylates, polyurethanes and rigid

frequent change-overs or for those using hardeners in their ink. Its stainless steel body and glass viewing area make it easy to keep clean.

Depth - 450mm

Capacity

20 Liter Cleaning Fluid

Pump Drive

Pneumatic - 5 to 6 bar

Suction Connection

Piece

1 Inch

Weight

60kg

Compressed Air Connection

PVC. Excellent for industrial applications.

TPC 250 – *Two component ink for printing onto glass and bottles*

Also appropriate for materials such as thermoset plastics ceramics (duroplastics), metals, including chromed, nickered, gilded or rhodanized surfaces. Mixed with hardener HG, excellent adhesion is achieved when cured at 140 degrees Celsius for 20 to 30 minutes. Teca-Print TPC 250 is not only chemically and abrasion resistant but also has exceptional brilliance.

Additives and Accessories

In addition to our wide range of colors, we also provide the appropriate hardeners and cleaners.

Min 4 bar * Max 8 bar
